

### DESCRIPTION

The D-2000CB Cobranet Interface Module is designed for use with the D-2008SP Digital Mixing Processor Unit. When mounted to the D-2008SP, it allows audio transmission between this D-2008SP and other one. Each function is set by the dedicated setting software on a PC.

### SPECIFICATIONS

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
