

WIRELESS GUIDE SYSTEM

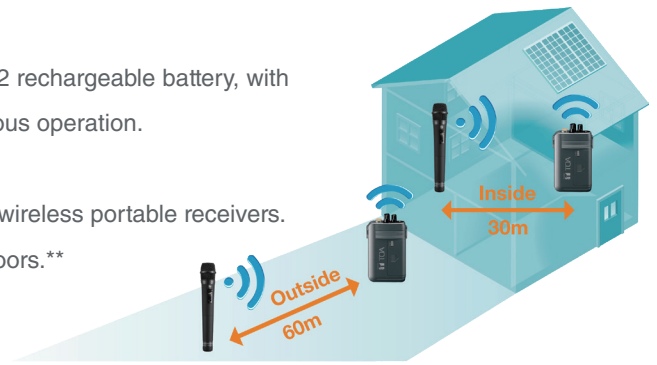

Be Heard, Be Clear

Features

- 16 different frequencies can be used simultaneously.
- Compact, light, and easy to operate— even for the very first time.
- Both the wireless transmitter and receiver use the TOA WB-2000-2 rechargeable battery, with the WT-5100 wireless receiver providing up to 16 hours of continuous operation.
- Frequency range of 576 to 865 MHz.*
- One wireless transmitter can be assigned an unlimited number of wireless portable receivers.
- Clear coverage up to 30 meters indoors and up to 60 meters outdoors.**

* varies by country.

** varies according to the surrounding environment.

Applications

Guided Tour

Conference

WT-5100

Wireless Portable Receiver

- Tunable to any of 16 different frequencies
- Runs for 16 hours on a fully charged WB-2000-2 rechargeable battery
- Battery status indicator
- Compact and lightweight body

YP-E401 Earphone

- $\phi 3.5$ mm
- mini plug (2 pole)

WM-5325

Wireless Portable Transmitter

- Microphone sensitivity adjustment (-14 dB to -20 dB)
- 13 hours of quality performance from a fully charged WB-2000-2 rechargeable battery
- Battery status indicator
- Compact and lightweight body

YP-M5300

- Unidirectional lavalier microphone

YP-M5310

- Omnidirectional lavalier microphone

WH-4000H

- Unidirectional headset microphone

WM-5225

Wireless Handheld Microphone

- Condenser cardioid microphone capsule
- Ideal for speech-related applications
- Turns on/off with one hand
- 13 hours of quality performance from a fully charged WB-2000-2 rechargeable battery
- Battery status indicator
