

DESCRIPTION

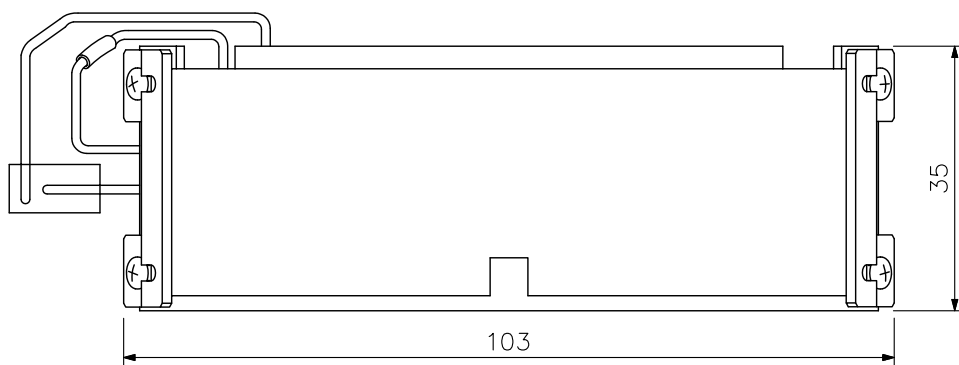

The C-A854H heater unit is designed to be used in conjunction with the 24V AC-type Vandal resistant day/night camera.
Installing this heater unit in the camera allows the camera to be used in locations exposed to extremely low ambient temperatures.

SPECIFICATIONS

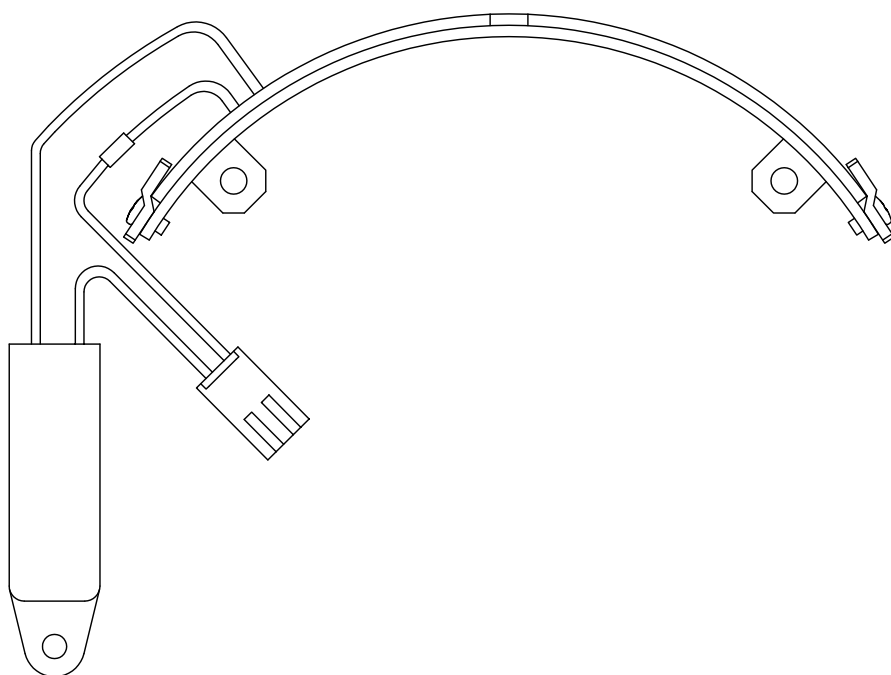

Power Source	24 V AC, 50/60 Hz
Power Consumption	15 W (630 mA)
Heater Operating Temperature	Turns on at approx. 10°C or less
Operating Temperature	-30°C to +50°C
Dimensions	103 (W) × 35 (H) × 29 (D) mm (excluding connector and thermostat)
Weight	35 g
Accessory	Mounting screw3

※Neither dew condensation in the dome cover due to rapid temperature change, nor snow and ice on the dome cover can be removed.
