VX - 3008F(T)

DESCRIPTION

The VX-3008F is a device designed to control the Voice evacuation announcements of TOA's VX-3000 Series rack-mount type voice evacuation system. It has audio input terminals and can output the amplified audio signals to the speaker lines when the optional power amplifier modules are mounted. It is possible to make an Emergency Warning Broadcast assigned a higher priority than the Emergency broadcast. Two patterns of the Emergency broadcast can be activated simultaneously. Compatible with network, the system can be configured in distributed arrangement. Features include the following functions: Digital signal processing function that enables appropriate acoustic adjustment for individual input sound sources and output amplifiers, Feedback suppressor function that automatically suppresses accustic feedback when it occurs. VOX function that allows start/stop control of automatically suppresses acoustic feedback when it occurs, VOX function that allows start/stop control of broadcast by way of an audio, trigger, and ANC function that enables an ambient noise control. (The ANC function distinguishes between the unit's output sound and the ambient noise. The unit's output sound is not detected

Indicators that show such statuses as fault status and power amplifier signal status are provided.

It has 8 speaker output channels.

A total of 3 power amplifier modules (2 for zone amplifier use and 1 for standby amplifier use) can be mounted. Equipped with a matrix output, the VX-3008F can be used as 2-bus speaker selector using 2 power amplifiers. Setting the matrix output destination makes 1-bus and 2-bus zones coexist.

Zones can be expanded by connecting the unit having amplifier module(s) and the one having no amplifier module. As the VX-3008F is equipped with Standby amplifier input/output terminal, the standby amplifier, when mounted, can be shared among VX-3000F units.

■ SPECIFICATIONS

Power Source	31 V DC (operating range: 20 - 33 V DC), removable terminal block (4 pins)
Power Consumption	85 W at 31 V DC
